REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The enablement rejection of record is based on whether the data at Table 1 on page 11 is due to (1) the tumor not being implanted; (2) other normal B or T cells in lymph node not properly proliferated instead of tumor cells being killed by the administered soluble lymphotoxin-beta receptor. The lymph node weight reduction disclosed at Table 1 could be due to other factors raised in the enablement rejection, but it could be also due to tumor cell killing. During the appeal's conference, it was agreed that the 2-fold reduction of lymph node weight at Experiment I at Table 1 should be interpreted as due to tumor volume reduction rather than other factors raised in the enablement rejection of record, since it is not known how much lower the lymph node reduction would be based on normal T or B cell proliferation reduction or tumor not being planted in the first place because of the immunosuppressive effect of the administered soluble lymphotoxin-beta receptor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
